AirBridge

Wireless Adapter

Lossless transmission

Full mobility

Plug and play

Compact design

ACC4100

Full mobility without compromises

Stationary dictation made mobile

The Philips AirBridge Wireless Adapter is the ideal companion when working on the go. Use your SpeechMike Premium Air Wireless Dictation Microphone and SpeechOne Wireless Dictation Headset, even without the docking station. Simply plug in the adapter into a USB slot and instantly benefit from lossless audio transmission. Despite its compact size, the adapter offers you the same lossless audio transmission technology as the docking station.

Top performance

- Lossless transmission for excellent recordings which capture every word
- Easy pairing for quick switching between workstations
- Full mobility for free movement without compromising recording quality
- Compact design for maximum freedom and convenience

Highlights

Lossless audio transmission

The patented lossless audio transmission technology offers a level of quality which is unattainable by headsets based on Bluetooth or DECT technology. The cutting edge technology ensures every word is captured from the moment you press record. A warning signal notifies the author when moving out of the wireless range.

Quick and easy pairing

After a short 3-second initial pairing, automatic re-connection allows you to seamlessly switch between the docking station and your AirBridge. This makes it even easier and more convenient to get up and move away from your desk and dictate on the go. The green and red colored light indicates whether you are connected or not.

Full mobility

AirBridge Wireless Adapter allows you to freely move around and pace whilst working. You can move up to 5 meters (16 feet) away from your workstation, and your recordings are safely transmitted to your computer in highest quality, without any interruptions.

Compact design

The compact design of the adapter makes it fit perfectly into your pocket, so it can easily be taken along anywhere you go. It is the ideal accessory to your docking station, giving you maximum freedom and flexibility for your working day.

Specifications

Wireless connectivity

Wireless technology: 2.4 GHz ISM Band
Modulation: 8-FSK
Maximum range: up to 5 m / 16 ft (in clear view)

Connectivity

USB: type A

Convenience

Firmware upgradeable

Compatible products

SpeechMike Premium Air Dictation Microphone SMP4000
SpeechOne Wireless Headset PSM6000

Power

Power consumption: 200 mW

Green specifications

Compliant to 2011/65/EU (RoHS)
